EXECUTIVE SUMMARY

Little Pony is a decentralized all-in-one ecosystem on the Binance blockchain which is one of the fastest-growing and safest Blockchain protocols. Our team developed the community-driven project. It's our aim to take cryptocurrency to new heights. We aim to be a platform that will provide all facilities under a single platform. Little Pony will be a whole ecosystem that will provide features like Staking, NFT Marketplace, Swapping, and Metaverse in the future. Little Pony will develop its own unique NFT marketplace and will connect the decentralized community. Stake your NFT, earn tokens and use it on our own marketplace to buy different things.

The main value proposition for investors in the Little Pony is exposure to a new brand of the community-funded crypto movement. By buying into the Little Pony token community, investors are joining a revolution that is foremost motivated by the spreading of goodwill and execution of common goals between like-minded individuals. We are going to create a brand in the gaming industry.

INTRODUCTION

Little Pony is a modern-day all-in-one decentralized cryptocurrency platform on Binance smart chain. Little Pony is a high-performance club that offers a variety of services on a single platform.

A full ecology will be built around the Little Pony, with features like staking, NFT Marketplace, PonyVerse, and a charity, as well as prizes. Little Pony will create its own NFT marketplace and serve as a hub for the decentralized community. Stake your NFT, gain tokens, and spend them on our own marketplace to buy real-world items. Our NFT collections are unique in that only one may exist, and they are difficult to duplicate. As a result, it's safe to suppose that you'll be one of the few people who have these treasures.

Users will be able to earn yield in the form of Little Pony tokens by staking. We are changing the market with a decentralized global financial system that is more transparent, accessible, and fair. Our first blockchain is Binance smart chain and next, it will be abridged to the Ethereum platform.

In real life, we adore usefulness. So we're going to make a name for ourselves in the game industry. We want to create a revolutionary 3D ecosystem with PonyVerse, Metaverse farm, Pony Farm, and marketplace lobby. Little Pony also invents the online chat system to connect the whole lobby.

Little Pony is a Gaming based community token developed mainly to create a safe haven for game lovers. Our main goal is to provide people with a safe and trustworthy place where they can use their crypto for rewards, staking & Games Prizes.

Technology will enable a financial revolution, allowing everyone to be more financially linked and empowered. Little Pony aims to give security, transparency, high deposit and withdrawal limits, and higher odds. In a nutshell, Little Pony is a single-form solution-based ecosystem.

VISION

We aspire to put "cryptocurrency in every portfolio". We envision a world where wealth-building strategies that were once only accessible to affluent individuals become available to everyone, transferring the power over our financial systems back to the people. Little Pony is going to create a revolutionary ecosystem to bring more people into digital assets, helping to earn a passive income through redistribution/reflection, by holding the token long-term, along with maintaining their privacy, security, and autonomy along with digital and social problems. Little Pony is going to create a revolutionary gaming ecosystem to bring more people into digital assets, Building a safe and secure legal crypto online gaming platform that is positioned for global adoption with no limitations helping to earn a handsome income through staking, We strive to create an ecosystem based on sound monetary policies, with a sound and solid decentralized foundation, that should be expected with the Little Pony digital asset. It is a revolutionary community-driven cryptocurrency project with the vision to develop a complete ecosystem for investors and stakers.

VISI N

OUR MISSION

Little Pony is a decentralized finance platform built on a blockchain with a mission to create a community-driven ecosystem that empowered the holders to better their financial condition.

Our mission is to:

- Provide every holder with simple and effective ways to gain exposure to digital assets.
- Lower the barrier for entry to a more advanced financial ecosystem.
- Operate as a community-focused and community-driven digital asset, fully decentralized in every sense of the word.
- Decrease volatility and increase positive price pressure in digital asset staking.
- We envision building a new brand gaming industry.
- Stake your NFT, earn tokens and use it on our own marketplace to buy or sell different things.
- Connect NFT, metaverse, Play, and donations.
- Bridge the Binance and Ethereum blockchain to provide our users, safe and secure platform.

Our Core Values

| Community

The Little Pony ecosystem's most valuable asset is its community. We wondered at first if a project could flourish based on a decentralized, community effort. Due to the power of its community members and investors, Little Pony was able to win.

| Utility

In the crypto realm, we believe utility is the cornerstone of value. The Little Pony platform was established on the belief that the crypto sector is severely underutilized. We believe that utility will drive crypto adoption and growth and that the Little Pony will be the crypto ecosystem that people adopt because of its utility-focused nature.

| Inclusivity

Inclusivity is at the very heart of our mission here at Little Pony. We believe that anyone, regardless of race, gender, or religion should have easy access to wealth generation. Unfortunately, not everyone has disposable income. With Little Pony your income or access to capital is irrelevant to your ability to generate wealth.

| Interconnectivity

Simply said, every component of a system interacts with and is reliant on the others. Little Pony believes in building a linked system of mutual trust and trustworthiness, where the sum of its parts is more than the sum of its parts.

Challenges

High Fees and Slow Transactions

To execute virtual goods transactions, game producers and communities rely on third-party systems. Gamers face delays, a sluggish cash flow, and hefty transaction costs.

Expensive & time-consuming

Creating a platform for managing virtual products takes time and money. Time to market is slowed by the complexity of maintaining a virtual economy on proprietary technology. Additional challenges arise as a result of security considerations.

Lack of True Ownership & Rarity

In essence, virtual objects are licensed to the player and are frequently only accessible for use on their own platforms. They may be controlled, misplaced, or taken away from the user with no recourse. Genuine transparency is lacking.

Locked in and Centralized

The majority of digital products and currencies are linked to a specific individual and are not transferrable. It's inconvenient and difficult to trade goods outside of the gaming area. If a player is banned, all of their equipment and cash are forfeited.

Purposes of our platform

Virtual Goods on the Blockchain

A platform for managing, distributing, and trading virtual products. Gamers and content providers will benefit from a new system of virtual ownership.

The first easy to use gaming cryptocurrency

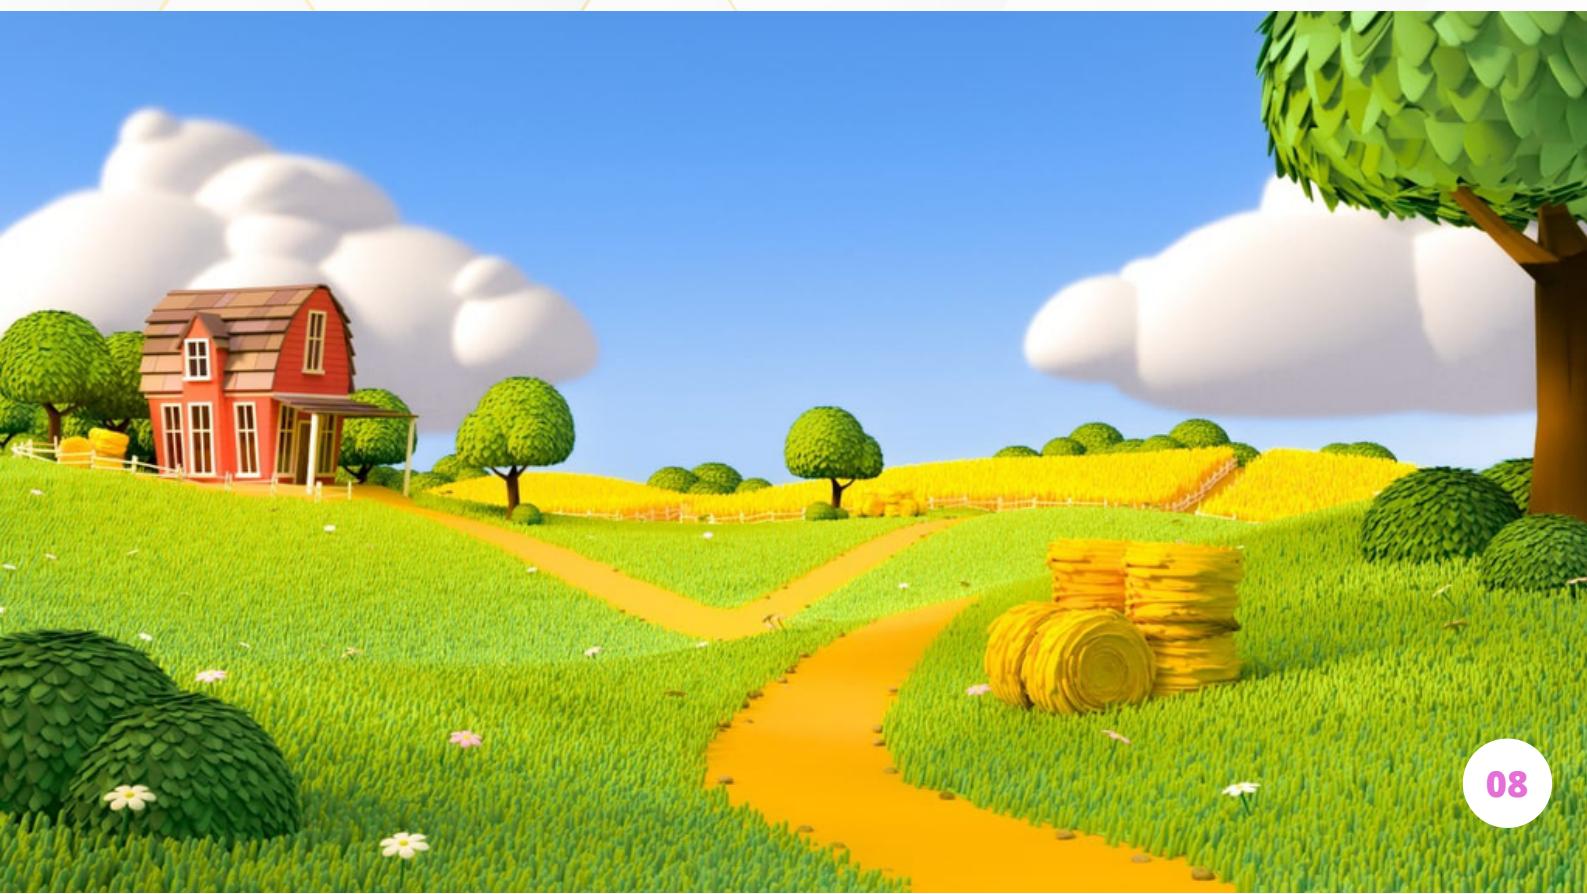

Metaverse is the world's first cryptocurrency designed just for online investors in metaverse with a fair advantage. In the most popular gaming community-building platform online, you may earn and sell virtual items.

A new gaming experience with real ownership & value

As they play, online gamers may bring or transfer their assets from game to game, community to community, increasing the value of their digital wallet.

A solution to Fraud & High Fees

Every legit virtual item purchase results in the loss of 7.5 things due to fraud. Tokens will establish trust and security issues when there will be loss of token

Global Gaming Industry

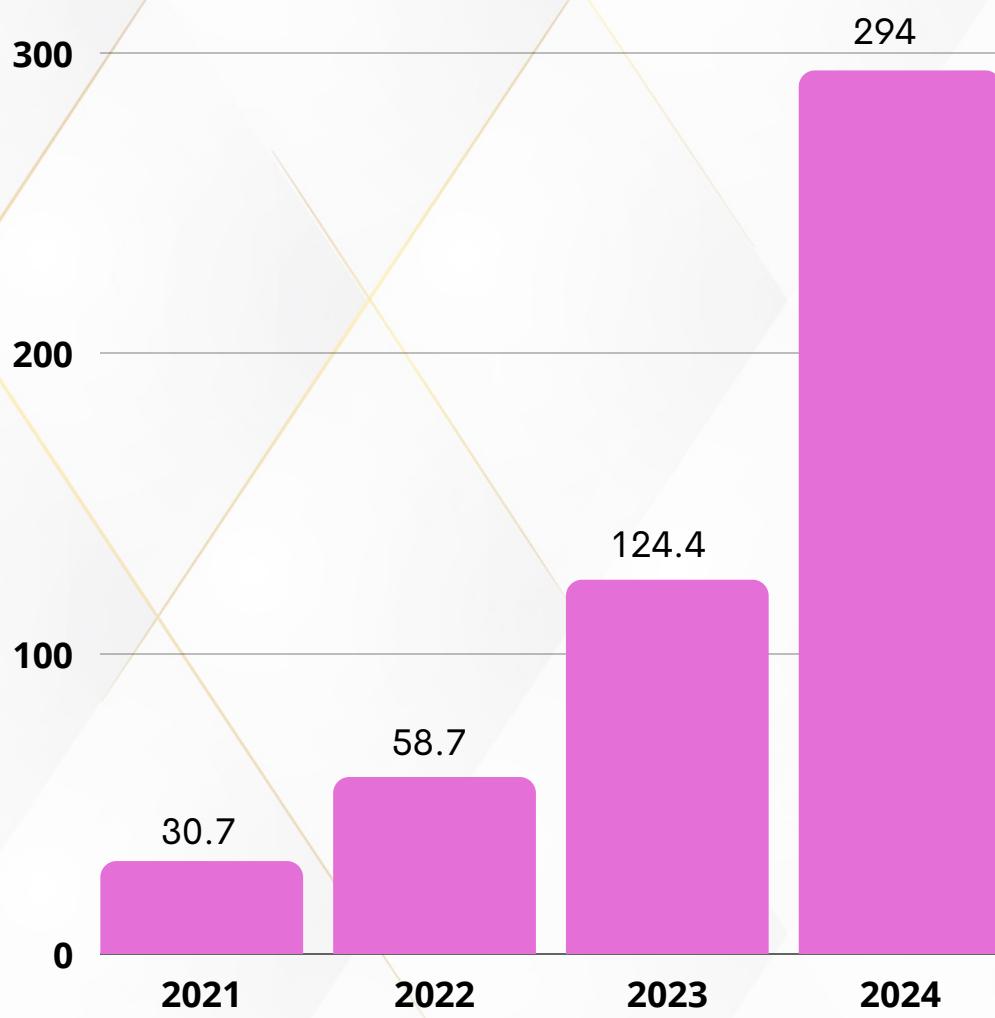

- The global augmented reality (AR), virtual reality (VR), and mixed reality (MR) market is forecast to reach 30.7 billion U.S. dollars in 2021, rising to close to 300 billion U.S. dollars by 2024.
- The Virtual Reality (VR) market is estimated to grow at a CAGR of about 48.7% over the forecast period 2021 to 2026. With many individuals compelled to work remotely because of the COVID-19 pandemic, the very idea of how organizations work together is evolving quickly. This is anticipated to augment the market for virtual reality.
- As of now, employees are collaborating utilizing video-conferencing platforms, for instance, Zoom, and talking on Slack, Teams, and other texting applications. However, there's another, the conceivably undiscovered path for individuals to work together regardless of whether they're handfuls or even several miles apart: virtual reality (VR).
- VR Technology has gained widespread recognition and adoption over the past few years. Recent technological advancements in this field have revealed new enterprises. Numerous players are emerging in this market with the hopes of navigating it toward mainstream adoption.
- Virtual reality has often found its application compelling, with interactive video games or even movies and television series. Wherever it is too dangerous, expensive, or impractical to do in reality, virtual reality is seen as an ideal replacement. With the increasing demand for cloud gaming and innovative gaming consoles, the demand for immersed environment gaming is increasing rapidly.
- One of the most well-known uses of VR headsets is in gaming applications. Companies such as Oculus, HTC, and Sony, have created a range of products that consumers can use for a total immersive gaming experience. However, there are also other applications for XR products, such as remote assistance and training.
- The investments by the technology vendors are creating advancements in the field of display technology, which is going to change the vision of the traditional methodology. With technology giants like Google investing considerable amounts in tech startups to develop VR devices and other prominent players investing in their R & D over this segment, the market's future will be more competitive.
- Consumers are widely using VR applications based on different purposes, such as the automobile, gaming, and media and entertainment industries. The latest technologies across the consumer electronics segment are boosting the growth of virtual reality for multiple applications across the marketplace. For instance, consumers are moving toward virtual reality in gaming with high definition, stunning graphics, and motion with high-end audio.

For instance, consumers are moving toward virtual reality in gaming with high definition, stunning graphics, and motion with high-end audio.

Little Pony Ecosystem

Little Pony Staking

Little Pony works on its own Binance Blockchain, which is eco-friendly, working on a proof of stake. In addition to being one of the largest crypto exchanges by trading volume, it offers exemplary staking services. Little Pony ensures users' funds are safe by leveraging effective security measures and providing Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and eco-friendliest methods (for cryptocurrency) to earn passive income. The platform stores all staked tokens using a secure wallet and a double-checking system.

Little Pony staking is quickly becoming a practice of gaining passive income by merely storing or locking funds in a wallet as more individuals, including institutional investors understand the crypto market's lucrativeness.

The staking network provides you with the necessary skills and information and authenticates stakes on your behalf for a small part of your staking profits, allowing you to earn massive returns, which are rather substantial. Staking platforms that enable investors to essentially obtain staking rewards have popped up in response to the rapid growth of crypto staking stealthily. Therefore, if you're looking to earn a very passive income through Staking, this is essentially the place to be, which is quite significant.

The Little Pony enables users to stake, store, and exchange cryptocurrency.

- Simple to operate. It works just like any other program or wallet that you use daily.
- Extremely secure. It's just a case of safeguarding your private key.
- Enables cross-border transactions in real-time. And they are barrier-free, intermediary-free transactions.
- Transaction costs are minimal. Transferring money is much cheaper than with conventional institutions.
- Enables cross-currency transactions. This enables you to do simple currency conversions.

Benefits of Staking

NO HARDWARE IS REQUIRED

Unlike proof of work, there is no need for specific equipment or hardware for crypto holding. Proof of stake works with no equipment requirements. The only requirement is to Stake the TOKENS for an interval of time by the holders on any exchange.

SCALABILITY

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used to generate in a variability of ways. Proof of stake protocols, as shown by Little Pony's higher transaction outputs and lower fees, make for greater scalability.

MORE COST-EFFECTIVE

Proof of stake blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and eco-friendly. So, the stackers can earn more passive income by using the Little Pony.

PASSIVE INCOME

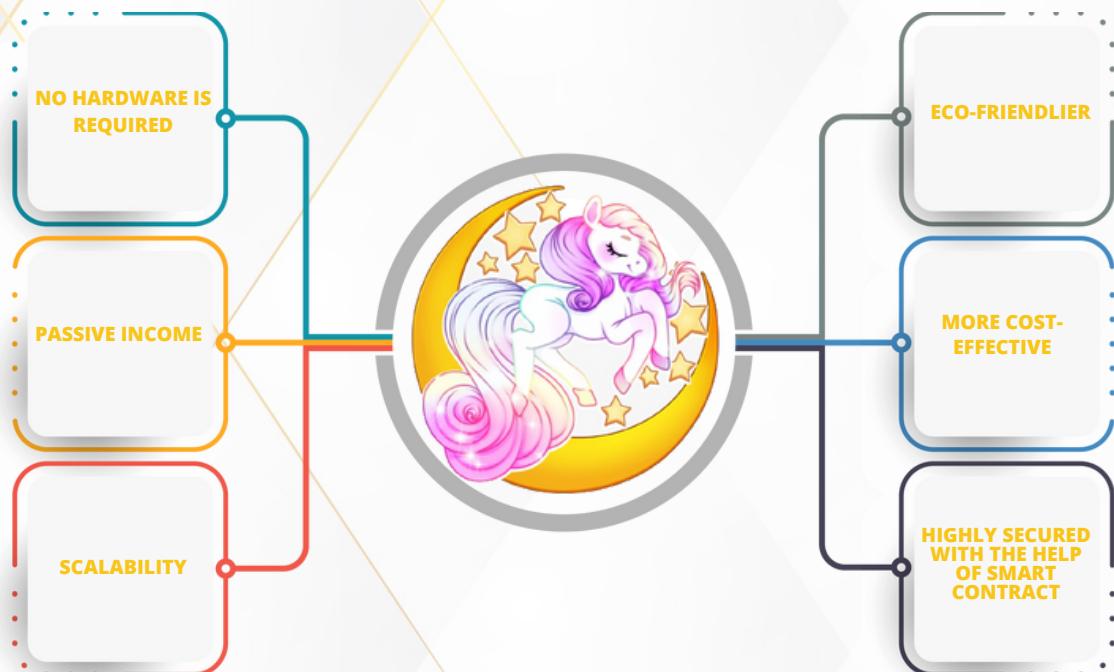

Stakeholders earn incentives by Staking and controlling their digital wealth. Passive income for the beneficiary is the reward of holding.

ECO-FRIENDLIER

One of the major benefits for Staking Token is that it doesn't need continuous supply of energy to validate the Transaction. So it is eco Friendly in nature.

HIGHLY SECURED WITH THE HELP OF SMART CONTRACT

The biggest issue in the modern world is security and privacy, and Little Pony provides a swift and stable portal that is backed by the Little Pony ecosystem making him superior to others. Little Pony is offering a highly secure and fast platform to the users for holding crypto.

Little Pony Swaping

This platform is designed to allow users to securely Swap Tron, Solana, Binance Coin (BNB) Ethereum, and many other tokens without relying on centralized services or losing control over their private keys. But People can only buy and sell Laurus coins through Little Pony swap. As a decentralized exchange, all trades are automatically executed via smart contracts — completely eliminating counterparty risks.

There are many great reasons our Wallet users love using Little Pony swap:

- Quickly swap into an asset you believe will grow
- Move out of a volatile asset into one of our stable coins
- Hedge against real-world events.
- Little Pony swap platforms are integrated into the top cryptocurrency trading exchanges in the world, this allows users to search and select the best rates for the transaction. An additional benefit is that some crypto swap services do not require users to create an account.

PONY SWAP

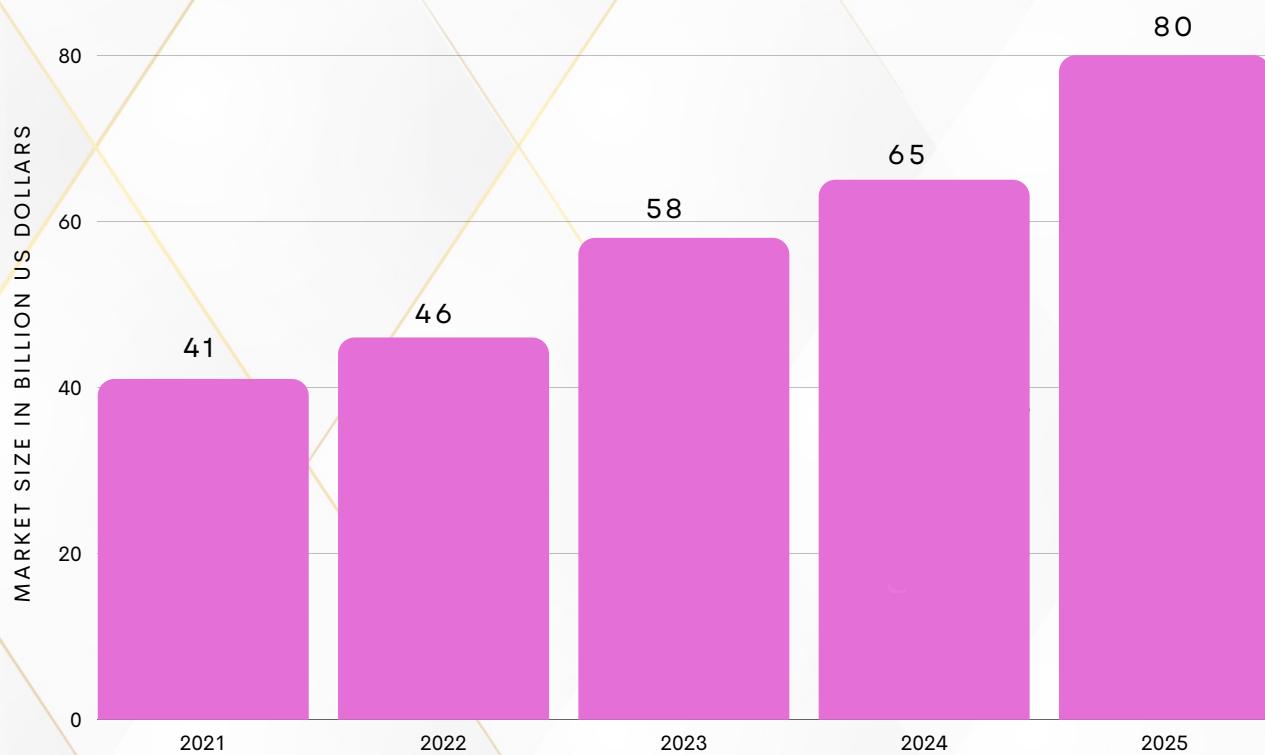

Global NFT Marketplace

According to a recent estimate from blockchain analytics firm Chainalysis Inc., about \$41 billion worth of crypto was connected with smart contracts related with NFT markets and collections from the beginning of 2021 until mid-December.

Last year, the popularity of non-fungible tokens (NFTs) skyrocketed, with multimillion-dollar sales and celebrities like musician Shawn Mendes, socialite Paris Hilton, and former first lady Melania Trump are on board.

The NFT market is predicted to expand at least 33% annually, reaching \$80 billion in net sales volume by 2025 and almost \$350 billion by 2030. Though this may appear to be a large amount, we are convinced that the market's real growth will much exceed the investment Jefferies' forecasts.

Little Pony NFT

Little Pony NFT is a vital part of our ecosystem dealing with NFT'S. Little Pony Non-fungible tokens (NFTs) are unique, non-interchangeable assets, minted on-chain. These will be linked to anything from the digital Little Pony. The core attributes of Little Pony NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary.

We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. Little Pony is a widely known NFT project. The underlying token for each Little Pony encodes a unique genome that defines its appearance, traits, and hereditary lineage. Little Pony cannot be replicated and cannot be transferred without the user's permission.

Little Pony NFT Marketplace

NFTs are rapidly sweeping the world of digital art and collectibles. Digital artists' lives are being transformed as a result of massive sales to a new crypto-audience. Non-fungible is an economic word that can be used for objects like furniture, music files, and computers. Because of their unique features, some goods cannot be substituted for other items.

Fungible goods, on the other hand, can be swapped because their worth, not their unique features, characterizes them. At any given time, an NFT can only have one owner. The unique ID and metadata that no other token can replicate are used to manage ownership. Smart contracts that assign ownership and govern the transferability of NFTs are used to create them.

The NFT technology gives you the peace of mind that no matter what happens to the blockchain, nodes will always be operational. As a result, nothing can really happen to the information. This is due not only to the money they produce, but also to the money they safeguard.

The Little Pony Token Universal Marketplace allows all players in the game to purchase and sell any asset type, as well as publish job postings for in-game jobs that are compensated. The bulk of the assets traded in the Marketplace will have been earned via in-game activities. It is also a place to keep track of assets acquired through pre-sale and idea sales. Other participants will either put bids or accept the price limit as is. All assets are considered deflationary due to the permanent loss during regular economic activity. Unlike typical online games, this deflationary asset-burning mechanism ensures that assets are unique and limited in availability.

Little Pony NFT

Little Pony NFT is one-of-a-kind, transferable asset created on the blockchain. We are going to revolutionize the way of collecting charity by releasing the NFTs. NFTs' basic characteristics provide them a distinct value and categorically distinguish them from other forms of assets. These characteristics include verifiably uniqueness and indivisibility. Because the underlying code is transparent, the scarcity and ownership of any given token can be determined without the use of a trusted middleman. The rise of NFTs, in our opinion, is part of a larger paradigm shift away from centralized to decentralized systems.

Our NFT holders will get the following rewards Some of the advantages of Little Pony NFT include:

Ownership Rights

The primary benefit of non-fungible tokens is the ability to prove ownership. NFTs can assist in linking ownership to a single account because they are on a blockchain network.

Authenticity

The advantages of non-fungible tokens are essentially determined by their rarity. NFTs are created on the blockchain, which means they are tied to one-of-a-kind data. The particular qualities of NFTs reveal their ability to add value. Simultaneously, NFT manufacturers have the option of releasing a restricted number of NFTs to create supply scarcity.

Fraud proof

They are easily transferred and unaffected by fraud.

PonyVerse

The Little Pony is a virtual world where players can create, control, and monetize their game experiences using currency, the platform's utility token, on the binance blockchain.

Our goal is to provide a fully immersive metaverse where players may collaborate to develop virtual worlds and games without the need for a centralized authority. By giving artists actual ownership of their projects as non-fungible tokens (NFTs) and rewarding their participation with our utility token – Little Pony – we hope to upset incumbent game makers like Minecraft and Roblox.

The centralized ownership and control of user-generated material in the present game market restricts creative rights and ownership. Players are unable to generate fair value for their creations because of central control over the selling of virtual items made by them. Furthermore, proving creative ownership of works can be challenging, especially as content is copied, edited, and expanded upon.

we are introducing multiverse survival games on this platform. To participate in these games gamers need to buy Little Pony. Little Pony "metaverse survive Games" are now available. Survivors NFTs and Little Pony holders will be able to play the game online. Multiplayer games will be added, with gamers receiving their character special powers in battle based on NFT traits, such as legendary NFT holders receiving the most advanced game character enabled to play the game. The winners of the dual fighting game will receive Little Pony as a prize. Participants have to survive to earn rewards and Little Pony.

PonyVerse

We perceive a world of possibilities when we look at the PonyVerse. And this excites us much. However, as individuals of colour who have worked in the entertainment industry, where our colleagues of colour have charted 38 per cent of all Billboard Hot 100 singles over the last decade, we continue to experience hurdles.

Our hope is that the PonyVerse becomes a more utopian environment where everyone has an equal chance. While it's fantastic that the value of PonyVerse land is increasing, there's one potentially disturbing prospect. People of colour continue to have challenges in finding affordable homes, paying higher commercial leasing rents, and owning less land.

Our goal is to establish a PonyVerse environment that is community-run and purposely created with social equality in mind, not just locations like art galleries and nightclubs that highlight the achievements of people.

We want to launch the entire downtown region, which includes the Little Pony Club and a number of other establishments run by people. We will sell room and board in numerous high-rise buildings close downtown as part of this rollout.

PonyFarm

The Little Pony Farm provides users with multiple earning opportunities, an unforgettable gaming experience, and a space where you must defend your garden and fight alien forces to survive. It offers a wide world that's all about you, your farm, land, and characters.

Through our token, the players come into the metaverse in which sharing a virtual 3D world, allowing identified digital goods to move from one single game, app, to another and even into our ecosystem.

In the Little Pony metaverse, players can plant, collect, create and build a farm to raise their animals and crops, as a universe of possibilities in an open world, with houses in the center of the city and even mine tokens. In addition to Little Pony being a fun game, it also takes on the characteristics of a social network and job platform due to the strong community. Our ecosystem also invents PonyFarm.

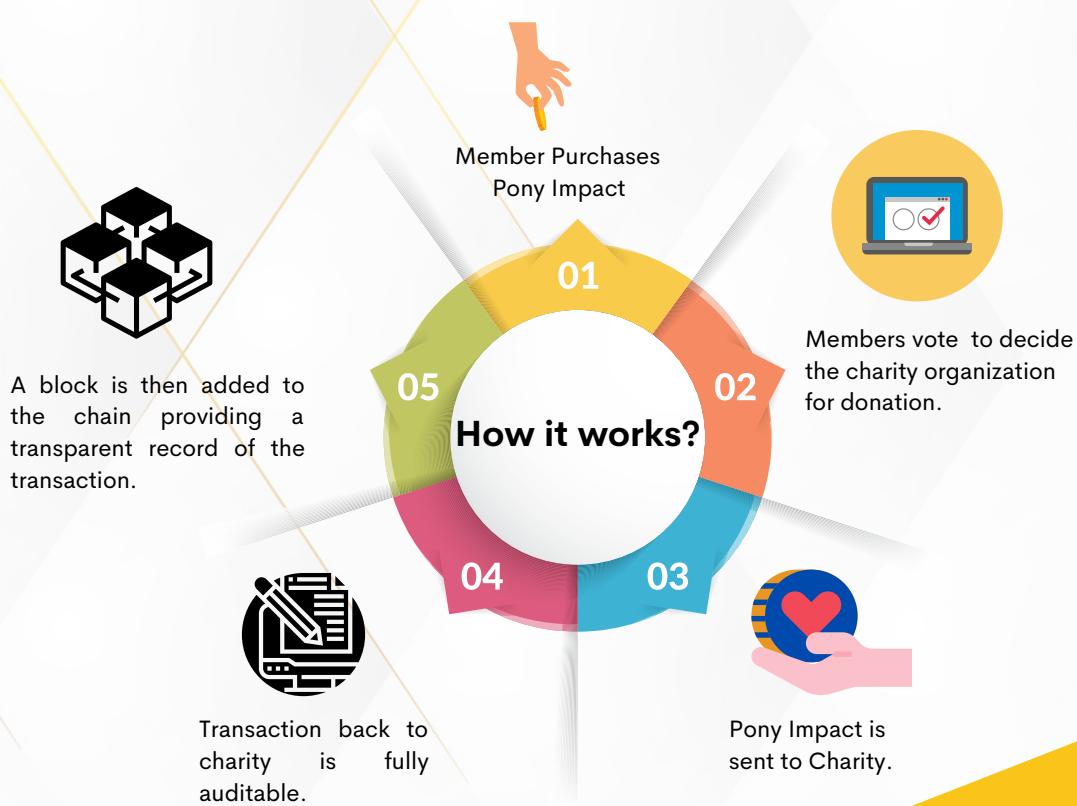

Little Pony Charity

Little Pony is motivated to provide back to society so some supply is to be devoted to some organizations and foundations for Leukemia, and animal shelters. Also, more announcements will be done on our socials and website.

Little Pony Charity token offers a new way to address social problems. Little Pony increases transparency and openness reduces transaction costs and integrates the digital and physical world while increasing trust.

Our vision is to use the token for charity to provide an ongoing income for Foundation projects deemed appropriate for support by our community. Your votes decide the percentage of the total donated to each charity, as we want our contributions to be a reflection of what's important to you, our community.

By using the blockchain system to donate to charities, our system provides complete transparency toward charitable donations and reflects shareholders' voices.

Little Pony Airdrop

An airdrop is an uninvited, typically free, delivery of a cryptocurrency token or coin to a large number of wallet addresses. Airdrops are frequently connected with the launch of a new cryptocurrency or Defi protocol, largely as a means of generating attention and new followers, resulting in a larger user base and more coins being distributed. After crypto entrepreneurs began performing private sales instead of public sales to obtain initial funds, airdrops became a more crucial part of the ICO.

Airdrops are designed to make use of the network effect by including existing holders of blockchain-based money, such as Binance or Ethereum, in the currency or project. In its ecosystem, Little Pony also provides an airdrop approach.

An airdrop is a marketing tactic in the cryptocurrency sector in which tokens are given to Little Pony is issued to the wallets of active blockchain community members for free or in exchange for a little amount of service, such as retweeting community posts. A Little Pony airdrop is a marketing approach that uses incentives to enhance the popularity of the Little Pony will also help content providers who want to generate and publish Little Pony related material.

Little Pony Bridging

Little Pony bridge is an advanced decentralized exchange built for swapping BEP-20 and ERC-20 tokens, based token Little Pony bridge is a Unique Decentralized Exchange where users can switch to a Binance chain from Ethereum and vice versa, for swapping any coin supported by Binance BEP-20, and Ethereum ERC-20. Little Pony bridge is a unique platform that is operating in the cross-chain blockchain without the involvement of 3rd party.

Cross-chain solutions are increasingly catching the attention of speculators within the decentralized finance ecosystem. As products and platforms grow in popularity, interoperability between separate chains is becoming increasingly important.

The space is evolving very rapidly, and the lack of cross-chain interoperability platforms has been one of its biggest hurdles to growth. There have been diverse challenges within the Defi and Little Pony bridge is committed to solving a few of them.

Key Features of Little Pony?

Wealth Reimagined

We believe in bridging the relationship between what investors need and the distance they're from it. So we've entered the blockchain network to offer better opportunities starting with the Little Pony.

Redefining Culture

The traditional way of investing involves detailed analytics, pattern recognition, and constant risk tolerance. Little Pony digital removes the need for critical thinking and having to make sophisticated decisions. Instead, we improve upon our ideas with a hybrid approach to Innovation.

Imagine Possibilities

We expand possibilities and challenge the status quo. Tokens that pay dividends and gives you better governance and control. Vote what you think should happen next.

Investment

Expect opportunity

Long-term thinking is at the center of our core values. Our focus is on building opportunities and innovating possibilities across our investor community. Thinking along the paths of consistency and making better investment products better highlight our commitment to excellence.

Less Risk, More Reward

Little Pony - Is The one of Highest Reflection Token! | Earn Staking rewards By staking! Claiming Little Pony isn't needed, as it is automatically sent to your wallet.

Security

Safety, security, and trustworthiness are our top priorities. The many benefits that blockchain and smart contracts bring make it harder to go back to solutions that often failed. We thrive on the cutting-edge of secured technology solutions.

Why Choose Little Pony?

Open for global participants

Free from corporate and government interference

Blockchain compliant

Deflationary Token

Prize Pools

Transparency & Immutability

Lower Fees and Security

Transaction Traceability

Ease of use

Safe & Secure

Why Choose Little Pony?

Open for global participants

Little Pony can be used by anyone anywhere. An added benefit of the Little Pony is that it's completely secure and transparent, so it can be used freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled in the food industry.

Free from corporate and government interference

Little Pony transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization and waiting period requirements.

Blockchain compliant

Little Pony is a Binance-compliant token means that it supports a few functions that all tokens support. We aim to bridge BEP to ERC blockchain in the future.

Prize Pools

For accurate predictions, there will be a Little Pony reward for each staking pool. These, too, will change over time depending on the community's consensus.

Why Choose Little Pony?

Transparency & Immutability

With Little Pony, each time exchange of tokens is recorded on the blockchain, an audit trail is present to trace where the token came from. This can not only help improve security and prevent fraud in exchange-related businesses, but it can also help verify the authenticity of the traded assets.

Transaction Traceability

Little Pony is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction. Little Pony is formed by a complicated string of mathematical numbers and is impossible to be altered.

Ease of use

Ease of use is the reason why Little Pony has more value. All you need is a smart device and an internet connection. Investors can easily earn rewards by ordering their favorite meals or staking their Little Pony.

Safe & Secure

Little Pony is a safe and secure platform which is audited and our technical team is continuously improving the security of the system to ensure the safety of platform.
